Connecting windows mobile 5

Note: These instructions have been tested on an O2 XDA and on an HP iPaq. They should work equally well on other devices, but there may be some minor detail variations on other platforms

From the Start menu, choose Settings, and then Connections:

📌 Settings		1 ∑∥ ≪ 🗙
	••	8
ActiveSync Mode	Beam	Bluetooth
0 8₀	((<mark>ף</mark>))	
Connections	iPAQ Wireless	Network Cards
		i
Personal System	m Connection	ns

Tap Network Cards to bring up the Configure Wireless Networks screen:

🐴 Settings	👔 👔 🕂	ok
Configure Wireless Net	works	0
ICWLANX	Available Available	^
inilinksys Distarbucks	Available Available	=
